

August 2017

CHILMINGTON GREEN, ASHFORD

ACCESS A – A28 ROUNDABOUT

Who Are We?

For those of you that may not know, we are Gallagher Ltd, the contractor who has been appointed to undertake the Infrastructure works to the new Chilmington Green project.

Planned Works to Access "A" – Construction of a New Roundabout on the A28

As part of our works we are constructing a new roundabout on the A28 for the main access to the new housing development.

As you probably aware, we have recently completed the works to the south side of the roundabout and switched the traffic onto this section, enabling us to commence the construction to the opposite north side.

To allow us to now complete the surfacing to the roundabout and the associated finishing works it will be necessary for us to undertake some night works.

The decision for this is due to Health & Safety reasons on the grounds of the protection to our operatives and that of the road user. It will also enable us implement further traffic control, due to lower volumes of traffic using the road resulting in reduced delays and less inconvenience to the road user than that of normal daylight hours.

Nights of the Planned Works

The works will be undertaken over the following nights:

Friday 4th August 2017
Friday 11th August 2017
Monday 14th August 2017
Tuesday 15th August 2017
Wednesday 16th August 2017
Thursday 17th August 2017
Friday 18th August 2017

There will be the requirement for 2 further nights for the application of the High Friction Surfacing in mid-September 2017. This will be for the application of a resin bound product that will be less intrusive. These dates are to be confirmed as they will be very much dependent on weather conditions and as such we will need to ensure a dry slot in the weather!

Planned Times

The works will commence at 18.30hrs and target completion for 04.00hrs. With this in mind all efforts will be made to complete all the noisier operations such as the removal of the old road surfacing before 23.00hrs. The placing of the new asphalt will then follow on.

We will endeavour to complete the works each night ahead of 04.00hrs but this will be dependent on weather conditions and no unexpected issues arising.

Key Contacts

We would like to reassure you that as outlined earlier we will put all efforts to ensure minimum disruption, timely completion and consideration to yourselves and the road users.

At this time, we would also like to thank you in advance for your understanding and co-operation in this matter.

If you should have any further concerns or require any further information at any time, please contact the Site & our night time supervisor on –
